**MOSAT**

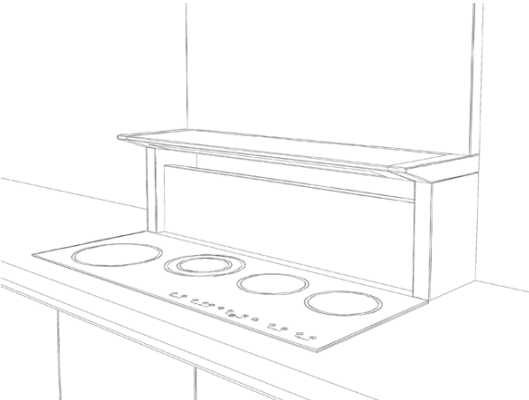

## FABRIANO: THE ROOTS OF QUALITY

Metalworking has deep roots in centuries past. It was this art form that gave rise to the city of Fabriano.

The various tools, technologies, and innovations applied first to iron, and then to steel, have merely refined the skills that we inherited from our forefathers and will pass down to our children. This heritage makes our city a point of reference throughout Europe in steel processing and in the home appliances industry, particularly in the production of exhaust hoods.

From the design to the final product, every stage at Mosat is conducted with extreme care and professionalism.

We offer reliable products, from the traditional to the innovative.

In tune with the customer, we create products that respond to varying market demands and differing trends. We have no limitations.

Each product is realized swiftly and with the uppermost reliability

# SMART TECHNOLOGY

*PATENTED*

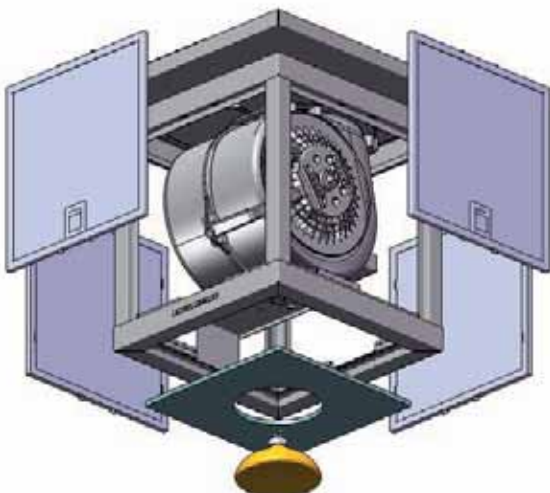

## **FREEDOM OF DESIGN AND EXHAUST EFFICIENCY**

The SMART exhaust system perfectly combines these two fundamental concepts that characterise a high quality hood.

The design can really follow the prevailing forms and trends on the international markets. A little jewel with big performance features.

SMART technology always follows your tastes in decorating your kitchen.

The kitchen will be your ideal place where day after day, thanks to an exhaust hood with SMART technology, you can enjoy the company of your loved ones in a warm and welcoming environment, an environment where the air is truly clean.

The heart of the SMART structure concentrates all the technology in a very small space to obtain powerful exhausting in complete silence.

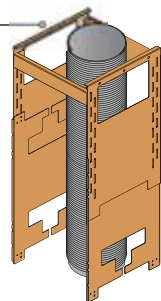

In the SMART system, we have distributed the air filtering surface over four sides, situated vertically, a structure that provides excellent exhaust efficiency.

Whether filtering or exhaust venting, you can decide when you want it.

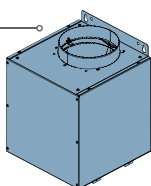

- EXHAUST EFFICIENCY
- MODULARITY
- SILENT OPERATION
- FREEDOM OF DESIGN
- RESPECT FOR THE ENVIRONMENT

# KLASS TECHNOLOGY

PATENTED

IN THE KITCHEN, where each day you rediscover the pleasure of being together and communicating, certain requirements have become mandatory now more than ever: the background silence, clean air, the harmony of forms, and living each day in a healthy and comfortable environment.

These are dimensions that Mosat envisioned for creating a new concept of exhaust hood that makes your time in the kitchen truly a pleasure.

1. Integrated exhaust module in the hood.
2. Vertical exhaust module outside the kitchen (attic).
3. Horizontal exhaust module outside the kitchen (external wall).

The **exhaust module** can be situated outside the room.

The **electronic control module** is easily accessible for inspection and servicing operations.

The **filtering and lighting module** provides immediate access to the filters and makes it very simple to replace the halogen lamp.
